East End Historic Buildings Inventory - Informational Meeting Planned for December 15

[Duluth, MN] - The City of Duluth Community Development Division and the Duluth Historic Preservation Commission will be holding an informational meeting on Thursday, December 15, 2011 in Room 303 of Duluth City Hall at 4:00 p.m. about the East End Historic Inventory of buildings and homes. The firm Summit Envirosolutions, Inc. has been hired to conduct this inventory and will be present at the meeting. The consultants will visit the following area starting December 12, 2011: north of I-35 up to Chester Park and between 14^h Avenue East and 21st Ave East.

The purpose of the meeting is to inform residents of the survey process, update the public on the survey and findings to date, and gather additional historic information residents may have.

The inventory is an important process for historic purposes but is also the first step needed for property owners who wish to request consideration of their homes or buildings for local or national historic registries.

Questions regarding this inventory can be addressed to Charles Froseth in the Community Development Office at (218) 730-5325.
