Park Point Beach House Stairs To Undergo Repair

[Duluth, MN] - The City of Duluth is informing the public that the Park Point Beach House will be getting a new set of concrete stairs starting July 20, 2015. The new stairs will replace the existing granite treads which are prone to shifting due to the sandy soil. The project will ensure access for all beach users and help with general upkeep and maintenance in the long run. The project will take approximately three weeks to finish. Access to the beach house will be available using the accessible path that is located southeast of the stairs.
